

MEMO FOR RECORD

STATINTL

Telecon / [REDACTED] (Nattick Labs) / July 27, 1964

REPORTED BY: Al Barmasse

(1) Canopy Coloring

Additional drop tests which Nattick has run on the gray canopies looked good under cloudy skies. Under clear blue skies there may be too much reflection.

They are treating the gray units with an inhibitor to reduce the reflectance (sheen) of the canopies.

He has another drop scheduled for next week. He will advise me of the results. At that time if the results look favorable, he will request that we supply him with a white 35 foot canopy.
